Nel 1970, al culmine di una fase di conquiste contrattuali importanti, fu approvato lo statuto dei diritti dei lavoratori. Una legge che era una svolta. Alcuni, forse troppi, anche a sinistra lo capirono in ritardo. In anni più recenti, con il dispiegarsi della globalizzazione, è iniziato un attacco allo statuto che ha portato allo smantellamento di sue parti fondamentali come la regola che prevedeva il reintegro senza giusta causa. contro i licenziamenti immotivati. Questo attacco, portato in nome dell'ideologia dominante che cantava le lodi della soppressione di tutte le regole sul lavoro, ha purtroppo fatto proseliti anche a sinistra. E dobbiamo al Governo Renzi un attacco tra i più gravi allo statuto dei lavoratori. È ovvio che a destra hanno approfittato di questo varco e hanno fatto di tutto per andare oltre.

The Britannica guide to matter (eBook, 2011) [WorldCat.org] Encyclopedia Britannica, The study of matter is the study of all material things, as well as their ability to transform from one state to another. Browser use is also being funneled into using "Snooping" browsers such as "Google Chrome" and "Microsoft Edge". Right now users are warned they have an unsecure browser if they are not using either Chrome or Edge. It is a scare tactic to make people switch. Why do they want folks to switch? The best answer I can come up with is that these two browsers are scripted to call home and report where and what the user is doing on their browser. Anyone using these browsers can attest that their spam mail and pop up ads has increased after switching to either one of these browsers. What about Firefox? The jury is still out about Firefox. Apparently it is not being flagged at the moment as an unsafe browser by MS nor Google. So who knows if they are onboard with the big snoop conspiracy? There are still a lot of websites that don't flag SeaMonkey either, however, some sites do warn about using SeaMonkey since it has popup protection and erases all traces of where one has been once the browser is closed.
